PROFESSIONAL EXPERIENCE

Frontend Developer

D2AI.CA

Toronto, ON

January 2025 - April 2025

- Built responsive tournament management interfaces with React, Next.js, and Material UI for seamless user experiences.
- Developed dynamic forms for tournament and team registration with real-time validation, improving usability.
- Integrated frontend with secure REST APIs using Axios and Context API for efficient state management.
- Contributed to backend APIs with FastAPI and MySQL, supporting full-stack data integrity and AWS deployment.
- Improved system performance by 40% through code optimization and efficient asset handling.

System Analyst

Infosys

January 2019 - December 2022

- Designed and maintained dynamic eCommerce websites for international clients, delivering seamless user experiences and responsive interfaces across North America and Europe.
- Developed and customized B2C and B2B storefronts, resulting in a 25% increase in online sales and improved customer retention for major global retailers.
- Boosted checkout efficiency and enhanced user engagement by integrating modern payment solutions (including "buy now, pay later" options), driving a 15% increase in client sales.
- Collaborated with cross-functional teams to implement scalable payment features for Fortune 500 brands, emphasizing secure, user-friendly front-end experiences.
- Built and optimized internal web tools for sales teams, improving data visualization and operational tracking, which reduced errors by 20%.
- Enhanced a customer-facing electronics storefront by implementing interactive trade-in functionality using JavaScript, JSTL, and partner APIs, improving data organization and processing by 30%.

PROJECTS

Budget Management App

- Built a dynamic budget management app with Next.js, allowing users to create budgets, track expenses, and set spending alerts.
- Developed interactive expense forms with real-time validation and automatic budget tracking.
- Created a notification system to trigger real-time alerts when expenses exceed set thresholds.

Movie and TV Show Trailers Website - cinema.fyi

- Built a dynamic, responsive web app with React, optimizing user experience and state management.
- Integrated RESTful APIs for seamless frontend-backend communication.
- Applied modern JavaScript (ES6+) and CSS3 for clean, maintainable code.
- Boosted performance using TanStack React Query for efficient data fetching and caching.
